Dr. Edgardo E. Tulin
President
Visayas State University

Dear Dr. Tulin,

Good day! Due to the limited availability of time in conducting experiments for our theses, we are compelled to look for better alternatives in our methods and employed equipment than what we have at the laboratory of our department. We have found that the Clariostar Plus Microplate reader at the Tuklas Lunas Development Center reader is more efficient and takes much lesser time and effort than the Double-Beam UV-Vis spectrophotometer at DoPAC. May we then ask to be allowed to use the instrument with direct supervision? Provided that our request is granted, and an ongoing analysis at the laboratory is in need of the equipment, we simply will give way for the analysis and won't be using the instrument.

We're hoping for your kind consideration. Thank you, and God bless!

Very truly yours,

ROBIE ANGELO S. MAGALLANES

DIANNA MARRIE M. NAYRE
