Dr. Edgardo E. Tulin  
President  
Visayas State University

Dear Dr. Tulin,

Good day! I hope you are doing well. The two of us are 4<sup>th</sup> year BS Chemistry students here at VSU, currently preparing for the experiments needed for our theses. We will be conducting our study on the free radical scavenging activity of Tibig fruit (*Ficus nota*) and Queen of the Night (*Epiphyllum oxypetalum*) leaves. However, we're not able to purchase 2-Diphenyl-1-picrylhydrazyl (DPPH) due to the uncertainty of conducting our theses because of the pandemic and availing DPPH would take us months before our order will arrive. Hence, we would like to ask for your approval of request that may we borrow certain amounts of 2,2-Diphenyl-1-picrylhydrazyl (DPPH) from the Biotechnology Laboratory. Rest assured that we will replace the borrowed chemical as soon as possible.

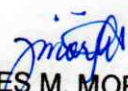

The specific amount of the chemical we are planning to borrow is:

1. 2,2-Diphenyl-1-picrylhydrazyl – 100 mg

We're hoping for your kind consideration. Thank you, and God bless!

Very truly yours,

  
FRANCIS CARLO A. LAO  
BSChem-4

  
JAMES M. MORTEL  
BSChem-4

Noted:

  
FELIX M. SALAS  
Thesis Adviser

  
ATOZ A. VASQUEZ  
Thesis Adviser

  
ELIZABETH S. QUEVEDO  
Head, DoPAC

APPROVED:

EDGARDO E. TULIN  
President
