Visayas State University

Baybay City, Leyte

Thru: **Charlie S. Andan, MSc.**
Chairperson, Meteorology Department

Dear **Dr. Tulin**,

The Philippine Meteorological Society Inc. (PMS), a non-stock, non-profit, and non-governmental organization dedicated to the advancement of meteorology, atmospheric sciences, and related disciplines in the Philippines. One of the advocacies of PMS is the promotion of science of meteorology in our country.

In 2022, PMS in partnership with Bicol University and Mariano Marcos State University organized the Meteorology for Young Scientist (Met4You) – a series of activities which aim to boost the enthusiasm and interest of young science enthusiasts in Meteorology and allied sciences in Bicol and Ilocos Regions respectively. We conducted research competition, seminar workshops for teachers and local government units, and roundtable discussions with the undergraduate students of Meteorology of the said institutions.

This year, PMS plans to bring this program to Eastern Visayas. In line with this, we would like to invite the Visayas State University through the Meteorology Department to be our partner in the said program. We hope that it will help the students, faculty, and other participants to have a deeper appreciation of meteorological and atmospheric sciences and forged collaborations in your region.

If this request merits your approval, the PMS will provide necessary resource persons, experts in the field of meteorology, lecture materials, prizes while we would like to request for your support in coordinating for the participants and venue for the event.

For any further inquiries and concerns you may contact **Mr. Robert Badrina** our Outreach Committee Vice Chairperson at **09568571821** or email address at rbbadrina@gmail.com. Mr. Badrina will be coordinating with your office regarding matter.

Thank you and we hope for your favorable response on this possible partnership with your university.

Very truly yours,

Engr. LORENZO A. MORON

PMS President
