Edgardo E. Tulin
President
Visayas State University

Thru:

Rosa Ophelia Velarde
Director, Research Office

Maria Juliet Ceniza
VP, Research and Extension and Innovation

Dear Dr. Tulin:

Greetings!

I would like to request for an extension of the implementation of the research project titled: *Visayas State University-Graduate School Offering a graduate school program for the health allied professionals: A feasibility study*. We encountered constraints particularly on the data gathering which hindered us to meet the target deadline of the project. As you may be aware our participants of this project are nurses. Their active role in the pandemic as frontliners made the data collection difficult and we needed to extend more time particularly on the retrieval of data, plus the ordeal we all experienced during the 4th quarter of 2021, post Typhoon Odette.

At present we have reached enough number of participants, and we are already on the data analysis, and soon we will begin with the report writing. We request an additional of six months to complete our lacking tasks for this project.

We look forward for a favorable approval to this request.

Truly,

JANET ALEXIS A. DE LOS SANTOS
Project Investigator

Recommending Approval:

JOEL REY U. ACOB
Dean, College of Nursing
