

April 11, 2023

**DR. ANATOLIO B. POLINAR**

Head, Department of Forest Sciences

Dear Dr. Polinar,

Greetings!

The NSTP Office is preparing for the incoming Regional Annual Administrative Tactical Inspection (RAATI) on the second week of May 2023. Part of the inspection the ROTC civic activities such as tree planting. I am aware that our ROTC Unit has planned the activity during the last part of the previous semester. However, because of heavy rains in the previous months, the activity was not pursued yet. As in the previous years together with other component program of NSTP, i.e., CWTS, we are doing tree planting. We are aware of the benefits tree planting as we have been joining it in several occasions. We will amplify the efforts of growing trees to mitigate climate change in our own efforts. Towards this goal, more that the fact that it is required output for ROTC program, we continuously expose our students to express love for our mother nature.

In this connection, the NSTP office would like to request for an available schedule for tree planting on **April 15, 2023 (AM)**. We will plant 100 narra seedling. Your support to our cause is needed to realize our goal. Thank you very much and more power!

Sincerely,

  
**JOY A. BELLEN**  
Director, NSTP Office
