

QUARTERLY RESEARCH PROGRESS REPORT

QUARTER: 2nd

**Research Title: Biological Activity and Chemistry of Essential Oils for
Agriculture, Pharmaceuticals and Industry**

I. Program/Project/Study Objectives:

- A. Develop products with enormous agricultural, pharmaceutical, and medicinal importance thereby opening a lot of opportunities for our agricultural students, farmers, food manufacturers and medical industries.

II. Relevance to VSU & College's Thrust and Priorities:

- A. This project will definitely respond to the objectives of the VSU Internalization Programs especially in the aspects of increasing collaboration with foreign HEIs on research; providing access to our students and staffs for training and studies abroad; increasing the number of foreign researchers and visiting scientists in the university; establish joint degree programs with foreign universities.

B. Highlights of accomplishments within the quarter

- A. Targets for the quarter
A1. Extraction of essential oil from selected indigenous tree species within Visayas State University.
- B. Highlights of accomplishments
B1. Among the 10 species selected 3 species were done and the others are still in progress.

C. Physical Report of Operation

A. Research Program

	Particulars/Name and Brief Description of Utilized/ Commercialized Technologies	Number
Outcome Indicator	None	
1. Number of research outputs utilized by the industry or by other beneficiaries		
Output Indicator		
1. Number of research outputs completed within the year
