Dear Madam:

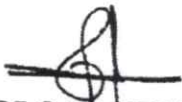

Greetings!

I am Paolo Flavio P. Sancho, a Master of Science in Agronomy minor in Soil Science second year graduating student at Visayas State University – Visca, Baybay City, Leyte. I am currently enrolled in AGRO 300.4 (Master Thesis). As we know that Typhoon Agaton severely hit Eastern and Central Visayas last April 2022, unfortunately my study has also been affected resulting to the reconduct of my set up. Currently, I am working as a Part-time instructor in the College of Agriculture at Cebu Technological University- Tuburan Campus. brought practical challenges not only for us students but also to our professors. Thus, I decided to secure an area to conduct my study at Asturias, Cebu.

In this connection, I would like to humbly request from your good office to allow me to conduct my study at Asturias, Cebu on April 24, 2023 – August 24, 2023. I hereby acknowledge that I will be responsible for certain risks and inherent injuries during the conduct of the study. I am fervently hoping for your positive response on this regard.

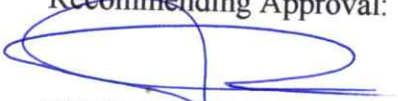

Thank you so much and God Bless!

Respectfully yours,

PAOLO FAVIO P. SANCHO
Graduate Student
