ENGR. MARTIN JAN E. MERCURIO, MSc
Head
Department of Geodetic Engineering
Visayas State University

Dear **Engr. Mercurio**,

Greetings!

The Project Weather and Atmospheric Information Services (Project WAIS) of the Department of Meteorology is currently undertaking a Memorandum of Agreement together with the Philippine Atmospheric, Geophysical, and Astronomical Services Administration (PAGASA – DOST) regarding the upgrading of the VSU Agrometeorological Station into a Synoptic Station. This endeavor entails the renovation of the building that is presently housing the observation instruments.

With this, we would like to request from your good office the necessary information regarding the location of the building, i.e., the longitude, latitude, and the elevation of the building. This data is necessary for the renovation and/or relocation of the said station should the need arises.

May this request merit your kind consideration and positive action.

Thank you very much.

Very truly yours,

CHARLINDO S. TORRION
Leader, Project WAIS
Faculty, DMet
