

January 10, 2022

DR. EDGARDO E. TULIN
President
Visayas State University

Dear Dr. Tulin:

Good day!

We would like to ask permission for the entry of Prycegas truck from Albueria, Leyte to the upper VSU campus to deliver one (1) tank of carbon dioxide to the Tuklas Lunas Development Center laboratory at PhilRootcrops. The tank will be used for the cell culture experiment of the project entitled **"Bioactivity and Molecular Characterization of Lead Compounds from Candidate Antidiabetic Indigenous Plants"**, of which you are the Project Leader. The date of the one-time delivery will be between January 17-21, 2022. Rest assured that they will go directly to the TLDC laboratory, leave the upper campus immediately after the delivery and strictly follow the health protocols as mandated by the IATF and USHER.

We hope for your favorable response. Thank you very much.

Respectfully yours,

JO JANE D. ATOK
Study Leader, VSU-IP-2021-6

Noted:

MA. THERESA P. LORETO
Director, ARI Center
