II. Technical Report

A. Executive Summary

The Visayas State University maintains its reputation as drivers of societal progress through its education, research, and extension endeavors. However, challenges remain, including insufficient problem delineation and low stakeholder participation in proposed interventions. Combating this requires the use of data-driven systems such as the Community-Based Monitoring System (CBMS) and the Barangay Management Information System (BMIS).

While these systems show promise, their full potential is yet to be realized due to user proficiency, data protection compliance, and technical limitations. As a result, this project aims to close these gaps by conducting a detailed assessment of present situations, allowing community leaders to make the most of these data management capabilities. The initiative intends to empower communities in solving varied concerns in education, health, the environment, and socioeconomics by improving technical skills, data processing, and analysis, as
