Dear Sir Tambis,

I would like to express my sincere interest in the Science Research Assistant position you have available. As a detail-oriented and analytical professional with my work experiences, I have gained solid research knowledge, data collection, and interpretation that will allow me to contribute toward the success of your research team at Philippine Root Crops & Research Training Center.

Through some of my experiences, I have become well versed in conducting research and analyzing data in a detailed and scientific manner. Additionally, I have gained the ability to integrate superior organization and communication skills across all levels of research, allowing me to excel in both independent and team-oriented environments.

My skills in research and administration, along with my dynamic collaborative abilities and my positive attitude and work ethic will excel me most in this role. I would appreciate the opportunity to offer more insight into my qualifications.

I'm very much interested to join your research team. In line with this, it would help me to sustain my financial needs since I am taking Masters's Program here at VSU this coming semester.

In the interim, thank you for reviewing this letter and the attached material.

.

Sincerely,

Rene Edrian P. Ygot
