CHERYL C. BATISTEL

Department Head

Department of Biological Sciences

Visayas State University

Dear Dr. Batistel,

I am writing to express my strong interest in the Part-Time Instructor position at the Department of Biological Sciences. As a graduate of the Bachelor of Science in Biology program with a major in Zoology, I am eager to contribute to the department's academic and research initiatives through a learner-centered and research-informed approach to teaching.

Throughout my academic journey, I have gained practical experience in foundational laboratory techniques, including bacterial isolation and culture, dissection, microscopy, and basic laboratory protocols. I have actively participated in various scientific conferences, symposia, and workshops. These include an international symposium on life sciences, webinars in different fields of biology, and a training course in bacterial bioinformatics and medical technologies. These experiences have broadened my interdisciplinary knowledge and strengthened my understanding of both current advancements and ongoing challenges in the biological sciences.

In addition to my scientific background, I also have teaching experience through my work in English language instruction for international learners. This experience has enhanced my ability to communicate complex concepts effectively and foster inclusive, engaging learning environments, which are essential in teaching science.

I am deeply committed to promoting academic excellence and scientific inquiry among students. The opportunity to serve as an Instructor aligns with my goals to encourage critical thinking, scientific curiosity, and responsible knowledge-building in the life sciences. I am confident that my technical training, collaborative mindset, and passion for biology and education will allow me to contribute meaningfully to the Department of Biological Sciences.

Thank you for considering my application. I would welcome the opportunity to discuss how I can support the department's instructional goals and contribute to its continued commitment to excellence in high quality instruction and innovative research.

Sincerely,

REGINA ISABEL B. PARIS

Bachelor of Science in Biology, Major in Zoology
