ALEMAR N. VALENZONA

Field Laborer

ABOUT ME

I am a responsible and hardworking high school graduate who has successfully completed the training in Organic Vegetable Production, leading to a National Certificate II (NC II) in Horticulture. This program has equipped me with essential skills in organic farming, soil and crop management, and sustainable agricultural practices. Alongside my interest in horticulture, I have a deep love for animals and have always taken the initiative to care for them with compassion and responsibility. My passion for nature—both in plants and animals—drives me to pursue opportunities where I can contribute to sustainable living and environmental care. I am eager to continue learning and growing in fields related to agriculture, animal care, and environmental sustainability.
