Dr. Jerry B. Sanguillosa
Department Head
Department of Plant Breeding and Genetics
Visayas State University

Dear Dr. Sanguillosa,

RE: Assistant Professor Application

I am passionate about quality teaching, learning, and research that addresses societal needs. I have been teaching at Nilai University, Malaysia, since 2006. In addition, I have undertaken decision-making responsibilities in educational curriculum development, academic programme review, accreditation, and quality assurance.

Before joining Nilai University, I headed the Food Programme at the Consumers International Regional Office of Asia and the Pacific (CI ROAP), based in Kuala Lumpur, Malaysia. My five-year career with CI ROAP (Aug 2000 - 2006) exposed me to various aspects of international NGO work. It allowed me to work harmoniously with international teams of different sizes and educational backgrounds.

The prospect of bringing my skills and experience to Visayas State University fills me with excitement. I am eager to discuss this potential full-time role with you and am grateful for your consideration of my application.

Yours sincerely,

Alice Escalante De Cruz
