**DHENBER C. LUSANTA**

OIC Director  
Ecological Farm and Resource Management Institute  
Visayas State University  
Visca, Baybay City, Leyte

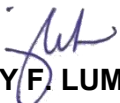

Dear Mr. Lusanta,

As an agricultural and biosystems engineer, I am excited to apply for the available position in Eco-FARMI. Having worked as research assistant (RA) for 2 years (2018-2020) in the GIS Unit of Eco-FARMI, I have honed my skills in QGIS processing, drone operation and mapping. I believe these skills can be made vital and will go a long way towards the institution's GIS-related and mapping undertakings. I have also been an RA in one of the Eco-FARMI's collaborative research project titled, "Climate-Resilient Agri-fisheries (CRA) Assessment, Targeting & Prioritization for Adaptation and Mitigation Initiative (AMIA)". I believe that the experiences and learnings I have earned during the conduct of that research will be relevant towards the institution's research and extension programs.

While I have been grateful of my current career as an instructor in SLSU-Bontoc, the workload had been so overwhelming due to overloaded teaching units and on top of that is multiple administrative designations. This prompted me to consider this career opportunity. I believe this new career opportunity will allow me a better work-life balance. I look forward on further developing and sharing my skills and experiences towards achieving the institution's mission and goals.

Thank you for your time and consideration. I would love to receive any response from you regarding this employment opportunity. I can be reached anytime via email at [jlumbre95@gmail.com](mailto:jlumbre95@gmail.com) or by my cellphone number 0945-322-6952.

Very truly yours,

  
**JINKY F. LUMBRE**  
Applicant
