RESEARCH EXPERIENCE

Undergraduate Research

Department of Business and Management, Visayas State University

- Collaborated with peers and faculty on agribusiness planning and feasibility studies focused on value-added agricultural products.
- Analyzed market trends, production costs, and profitability to develop sustainable business models for local enterprises.
- Participated in research and extension activities promoting agripreneurship and community-based enterprise development.
- Applied management, finance, and marketing principles to real-world agribusiness operations and student-led ventures.
- Served as Secretary of the Society of Agribusiness Students, handling documentation, correspondence, and organizational records for two years.

Herbanext Laboratories, Inc.

Feasibility Study: Common Service Facility Project — Second Semester, 2025

- Conducted a feasibility study for the establishment of a Common Service Facility (CSF) aimed at supporting local agribusinesses and product developers.
- Analyzed operational, financial, and technical requirements to assess the viability of shared processing and production facilities.
- Collaborated with industry professionals to gather data, identify challenges, and propose sustainable solutions for local enterprise growth.
- Applied agribusiness management principles to create a comprehensive project proposal aligning with Herbanext's mission for innovation and community partnership.
