I am writing to express my interest in the position of Information Systems Analyst II.

Having obtained my Bachelor's Degree in Electronics Engineering and working in the IT industry for years I hope to bring my knowledge, skills, and commitment to the Department.

For my IT experience, I have worked for 6 years as Structured Query Language (SQL) Database Administrator in which databases and systems are monitored with the use of different software to avoid downtime in the company. I have worked with different companies, although I have focused my IT experience in Database Administrator, I have worked with different companies so I was able to handle different tools and techniques while working. During my work in the school, I was able to help in the Accreditation as I have helped to create and update the website (google sites) for a specific College.

For my Engineering experience, I have worked as a Customer Quality Engineer for 2 years as a Customer Quality Engineer in Thailand. I am assigned to the Hewlett Packard (HP) client. My work deals mostly with interacting with clients by providing them updates and explaining the issues that happened during the process. By this, reports are used and also interact with co-workers that troubleshoot the process.

For more details of my qualifications and expertise, please review my attached files.

Thank you for taking the time to consider this application. I look forward to hearing from you.

Thanks and Regards,

DYAN M. MARQUEZ
