DR. DANIEL LESLIE S. TAN

OIC, President

Visayas State University

VisCA, Baybay City, Leyte

Attention: **DR. SUZETTE B. LINA**
Department Head, Department of Soil Science

Dear Dr. Tan,

I am writing to express my keen interest in the position of Instructor II in the Department of Soil Science, College of Agriculture and Food Sciences.

I have a Master of Science in Soil Science and a licensed Agriculturist, who currently held the position of CIP graduate fellow in the Agriculture Research Section, Philippine Nuclear Research Institute (PNRI) since 2021. I was assigned as the Calamansi Research and Development Center's project manager while I was a faculty at Mindoro State University (MinSU). I have participated in and directed some training programs and projects in the fields of plant nutrition and soil science, which have given me the fundamental knowledge and abilities I need to advance in the field of research.

I have extensive experience in a variety of laboratory tasks, such as the physical, chemical, and isotopic analysis of plant and soil samples. I am also very knowledgeable in field activities such as plot establishment, lay-outing, maintenance, and sampling. In addition, I've received training and experience in other areas including report and article writing, which has helped me produce terminal reports and publish a scientific article as the primary author in a peer-reviewed publication. These experiences have allowed me to become well-versed both in academic and research works.

With all these experiences, I will be able to carry out the tasks and obligations of an instructor in your esteemed department. Kindly consider my application.

Thank you.

Sincerely yours,

ANANE R. SEREÑINA
