EDGARDO E. TULIN

Director
Philippine Root Crop Research and Training Center
Visayas State University
Visca, Baybay City, Leyte, 6521-A

Sir;

I am writing this application letter to express my intent to apply for the Science Research Aide position posted at jobs.vsu.edu.ph to be assigned at the Philippine Root Crop Research and Training Center.

With a Bachelor's degree in Agricultural Engineering, and a recently passed eligibility, I hope to jumpstart my professional career in agricultural research, development, and extension with PhilRootCrops through this position and learn how to navigate the many aspects in science research. I am also willing to offer and develop my technical and social skills relevant for the position that would enable me to deliver the best service I could offer towards the attainment of success in any assignments and projects that shall be assigned. I lack in terms of employment experience, but I am confident that I have learned more than enough from the university to be able to grasp and act accordingly to, if not meet, the standards for this position. This position could not only jumpstart my career, but this can also help me measure the extents of my work flexibility and abilities, and put my knowledge and skills into use as your esteemed employee.

Should I be considered for this position, I would like to inform you also that it would be much easier to contact me through my email address since I reside in a no network coverage area so contacting me through phone would prove to be quite tricky. I look forward to hearing from you soon and be able to work with and learn from you. Thank you very much.

Respectfully yours,

KRYSTEL DENICE L. LABRADOR
