Subject: Application Letter for Part-time Instructor Position for the Department of Computer Science and Technology

Dear Ma'am,

With utmost respect, my name is Jose Arniel J. Pama, and I am a resident of Ormoc City, Leyte. I am writing this letter to express my intention to apply again as a part-time instructor in the Department of Computer Science and Technology at VSU.

My first semester at VSU-DCST was a blast. I am excited to try it again the second time. I enjoy sharing my relevant knowledge and experience in the software engineering and computer science industry with my younger peers.

As a refresher about my skillsets, I had been working as a software engineer for almost four years now. I specialize in web development and app development, but I can definitely teach any computer science subject under the sun. I have worked on several web development frameworks and technologies like VueJS, Ionic, Quasar, TailwindCSS, Flutter, Firebase, and Flutter. I have solid experience in software engineering so I can teach that as well. I also have some experience in UI/UX and have undertaken some bachelor's degree units in Artificial Intelligence. Additionally, the relevant programming languages that I have used in some of my previous works include Python, Javascript, Java, C, and C++ so I can also handle fundamental programming subjects.

Thank you so much for considering my application again. For more relevant information about my whereabouts, you may visit my updated online resume at https://resume.io/r/YqCDbyTyM and my online portfolio at https://pama-arniel.github.io/portfolio/.

Sincerely yours,

Jose Arniel Pama
