Certificate of Training

This is to certify that

Lorbert G. Mazo

Is a graduate of this Institution. This certifies further that he has passed the 2nd Class Assessment for Lathe Machine Operators given by the Technical Education and Skills Development Authority (TESDA).

The following are the skills covered in the assessment.

- Read and understand drawings with stated tolerances for lathe work.
- Operate the lathe machine for production of parts according to a drawing with stated tolerances.
- Sharpen and re-sharpen drills and cutting tools for the lathe machine.
- Use correctly the vernier caliper, micrometer screw, and dial indicator in actual lathe machine operations.
- Choose a feasible sequence of operations for jobs on hand.
- Do the regular maintenance work on the lathe machine.
- Special skills in producing internal and external threads.

(Safety is included in all areas mentioned above.)

Given this 7th day of June 2012 at Don Bosco Technology Center, Punta Princesa, Cebu City, Philippines.
