ROMMEL M. GARRIDO Jr.
Department Head
Department of Plant Breeding and Genetics
Visayas State University
Visca, Baybay City, Leyte

Dear Sir Garrido,

I'm writing to express my interest for instructor position in your humble office.

Having recently obtained my Bachelor in Science Degree in Agriculture (BSA) major in Plant Breeding in the Visayas State University, Baybay City, Leyte. I wish to bring my knowledge, skills, commitment and excellence to your Department's innovative environment.

As an Agriculturist, I've become equipped with the necessary knowledge and skills including project management, workforce organization, problem solving and can also work with minimal supervision since I was trained with my experienced in conducting an individual field thesis entitled Fiber Morphological Properties of Promising Abaca (*Musa textilis Nee*) Accession from NARC Germplasm Collection Grown Under VSU Condition. I am eager to learn and develop my professional skills. The enthusiasm I have to work will make a good addition to your team.

I look forward for your positive response. I can be your ideal candidate if given this opportunity. My documents attached for your review along with this letter. Please do not hesitate to call me so that we can arrange for an interview.

Respectfully,

Arshid C. Lim
