**HANNAH RISSAH F. ABAD**

Head, Department of Physics

Visayas State University

Visca, Baybay City, Leyte

**Ma'am Abad;**

Greetings!

I am writing to express my keen interest in the part-time **Instructor I** position of your department, as recently advertised. I hold both undergraduate and graduate degrees in **Physics** from the Mindanao State University–Iligan Institute of Technology (MSU-IIT), earned through the support of DOST-SEI scholarships.

I view this opportunity as a meaningful avenue to apply my academic and research background while continuing to grow personally and professionally.

Previously, I served as a Science Research Analyst and later as a Project Technical Assistant for a DOST-funded project implemented at MSU-IIT. These roles allowed me to gain valuable experience in scientific research and administrative work, enhancing my skills in collaboration, organization, and project management within an academic research setting.

I am enthusiastic about the opportunity to bring my research experience into the classroom and inspire the next generation of scientists and critical thinkers.

I would be grateful for the chance to further discuss how my qualifications align with your institution's goals. Thank you for considering my application. I look forward to the opportunity to contribute to your mission of nurturing and developing your students.

Sincerely,

**MARIA THERESA MAE M. MICOMPAL**
