Magdalene C. Unajan
Department Head
Department of Computer Science and Technology
Visayas State University
ViSCA, Baybay, Leyte

Dear Ms. Unajan:

I am interested in the part-time Instructor position posted on the VSU HRIS website. I am a BS in Information Technology graduate which was trained to be in-tuned with the business-side of software development, but I am also inclined into problem-solving and prototyping algorithms.

As a test engineer at Lexmark R&D Corporation, I understood the importance of adapting to the changing financial climate to deliver cost-efficient products without compromising the quality. I contributed to the successive delivery of new firmware and products by being active in the process improvements and in automation. I was able to instill the best outlook aside from being able to write clean and maintainable code lines.

At the Department of Computer Science and Technology, I was able to deliver my expected tasks. I'm proud to guide my students, especially the ESci 126a class, as they were all able to present promising projects using what they learned in the class.

I am active in the development of proprietary and open-source projects, and publishing my technical experiences online. This enables me to learn new technologies while also improving my writing and communication skills. I will be pursuing MS in Computer Science next year in the Cebu Institute of Technology, as I see the importance of formal education and professional guidance.

In relation to the job posting, I intend to continue my service in the academe, so I can still able to share my knowledge, skills, and expertise to prepare the students and to help them earn the right skill set and attitude before graduating. Please email or call me to set up an interview. I look forward to hearing from you.

Sincerely,

Rodney M. Maniego Jr.
