Edgardo E. Tulin, PhD.
University President
Visayas State University

Dear Mr. President,

Greetings!

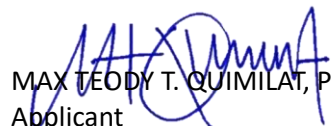

It has been a while that my thirst for knowledge and wisdom has not been quenched. I am placed in a program that has not been my field of expertise. It may be connected to my field but I felt so much suppression in the field of research and from actualizing my potential. Upon hearing of an open post for Associate Professor 1 in your research university specifically in the field of Social Sciences, It leaves me no choice but to apply for the post with enthusiasm and much hope that this is the place where I can grow more professionally and can fully use my potential in service to our local communities.

With this in mind, I MAX TEODY T. QUIMILAT would like to apply for an Associate Professor 1 post in the Department of Liberal Arts and Behavioral Sciences. I have a Doctorate in Philosophy in Anthropology earned just this year from the University of San. Carlos. I also earned my Master of Arts in Education in Social Sciences from Southern Leyte State University and a Bachelor's degree in Philosophy from Sacred Heart Seminary. I am currently an Assistant Professor 4 at Southern Leyte State University- Tomas Oppus Campus assigned in the Social Science Area in the College of Teacher Education. I have been teaching at the university for eleven years now and have also had my fair share of designations ranging from research center directorship and head of the research, innovation and extension of the campus.

Having all these in my experience backpack, It is my dream to be in a program that teaches philosophy, anthropology and social sciences in a liberal context and not be boxed in the realms of teacher education. Though I am comfortable with this, It is my professional fulfilment and sense of social responsibility to push forward the social sciences not only in instruction but also in research that is not only for education. With the possible placement in DLABS, I am very sure to achieve these goals, not only for myself and the university but also for doing my part to somehow better the living conditions of the communities around us through instruction, research and extension.

Thank you and I am hoping that I can join your team soon.

Respectfully Yours,

MAX TEODY T. QUIMILAT, PhD.
