MA. JULIET C. CENIZA
Vice President
Office of the Vice President for Research,
Extension and Innovation
Visayas State University
Visca, Baybay, Leyte

Dear Ma'am,

Warm Greetings!

I am writing this letter in line with my intention to fill-in Science Research Specialist I position deemed for my qualification and skills set as reflected in the Personal Data Sheet I have attached in this application letter. I finished my Masters degree in Soil Science at Central State University and enrolled 9 Ph.D units at the University of the Philippines, Los Baños last semester. However, because of financial difficulties brought about by this pandemic, I decided to file Leave of Absence and look for a job in the academe where I believe would be great for my career development.

For 12 years, I worked as an eggplant plant breeder for East-West Seed in Lipa City, Batangas. During my later years of stay with the company, I was part of a team who was tasked to introduce the grafted bitter melon in the market, with me being the researcher/scientist assigned to make the technology working for Philippine condition. The most critical part of the project was the market introduction where we need to do on-farm training.

I believe that my vast industry experience has given me enough practical agriculture knowledge so I will be able to work effectively and convincingly. Rest assured that I could be a good addition to your roster of motivated and highly competent workforce.

Please consider this letter as an instrument to show my earnest desire to be part of VSU family.

Thank you and More Power!

Very truly yours,

RONALD C. MAGOS

Applicant
