Diana Christa G. Milloza
Department Head
Department of Geodetic Engineering
Visayas State University
Visca, Baybay City, Leyte

Dear Engr. Milloza,

I write to apply for the Substitute Instructor position at your department. I have relevant experience in sharing my knowledge to students, Local Government Units and to my coworkers when I was a researcher and software developer. In various collaborations during my previous projects, I found that teaching and also learning in the process is a very rewarding experience.

Through the success of my previous projects, I believe I have good capability in communicating and discussing ideas and concepts. I am also passionate about integrating recent advancements in Computer Science to the practice of Geodetic Engineering and I am very willing to contribute to research projects in your department.

Thank you very much for your time.

Sincerely,

Wilmar Alfeche
