**CHRISTIAN VIE P. BALDONADO**

Department Head  
Faculty of Nursing  
Visayas State University  
Visca, Baybay City, Leyte

Dear Sir Baldonado:

I am writing to express my sincere interest in the instructor III position in Nursing Department recently posted by Visayas State University. I completed my Bachelor of Science in Medical Laboratory Science at St. Scholastica's College Tacloban, where I graduated Magna Cum Laude in 2018. With nearly six years of clinical experience and a solid foundation in academic instruction, I am confident in my ability to contribute meaningfully to the university's instructional and scientific objectives.

My professional journey has taken me through tertiary, secondary, and primary clinical laboratories, providing me with a broad and hands-on understanding of diagnostic testing and laboratory operations. I currently serve as the Chief Medical Technologist at Accu-Right Medical and Diagnostic Center, where I oversee laboratory functions, enforce quality assurance standards, and guide new practitioners in clinical practice. In addition to my clinical work, I served as a faculty member at the Nursing Department of St. Scholastica's College Tacloban from 2021 to 2023, teaching Biochemistry, Microbiology and Anatomy and Physiology and facilitating practical laboratory experiences for nursing students. This role reinforced my passion for education and highlighted the importance of bridging theoretical concepts with real-world application.

I am currently pursuing my master's degree in biology at Leyte Normal University. As a licensed Medical Technologist with a strong clinical background in microbiology, clinical chemistry, hematology, and molecular diagnostics, I bring a unique and valuable perspective to nursing education. My expertise bridges the gap between laboratory science and patient care, equipping nursing students with a deeper understanding of the scientific principles behind disease processes, diagnostic testing, and evidence-based practice. By integrating applied clinical concepts into teaching, I aim to strengthen students' competencies in interpreting lab results, recognizing pathophysiological changes, and making informed clinical decisions which are essential skills in modern nursing practice.

I firmly believe that medical technologists bring valuable insight to the academic setting, especially in courses that require a strong foundation in applied science. My goal as a faculty member is to cultivate critical thinking, scientific integrity, and professional discipline among future healthcare professionals. I strive to bridge the gap between laboratory science and bedside care, helping nursing students interpret diagnostic data, understand disease mechanisms, and enhance patient outcomes through informed clinical judgment.

I am deeply inspired by the mission of Visayas State University to deliver excellence and innovation in education. It would be a privilege to join its distinguished academic community and contribute to the formation of compassionate, competent, and science-grounded nursing professionals.

I have attached my Personal Data Sheet (PDS) and other proof of credentials for your perusal. For further queries, you can reach me through my mobile number 09469230949 or email at [acampadogiselle@gmail.com](mailto:acampadogiselle@gmail.com). Thank you very much for considering my application. I look forward to the opportunity to contribute to your institution's growth and excellence.

Respectfully yours,

  
Giselle A. Acampado, RMT  
Applicant
