DR. ROBELYN T. PIAMONTE

Director
National Abaca Research Center
Visayas State University
Visca, Baybay City, Leyte, 6521-A

Ma'am;

I am writing this letter in response to the hiring for Science Research Assistant position posted at jobs.vsu.edu.ph and hereby express my intent for this position that is to be assigned at the National Abaca Research Center.

With a Bachelor's degree in Agricultural Engineering acquired from the very university that the research center is situated, it is with confidence that I speak my desire to work in one of the research centers based in the university. As an agricultural engineering graduate, and a recently qualified practitioner of the profession, it would be a great opportunity to jumpstart my agricultural and biosystems engineering career at NARC so as to be familiarize and be able to navigate across the fields of development in abaca research which is considered to be one of the crops in the country with great potential in the industry and exports. I am also willing to offer my knowledge and set of skills relevant for the position, and I am also hopeful to learn and be able to hone and develop some skills under your supervision should there be specific skills and competencies that are required for the job. I honestly lack in employment experience, but I am hoping that my eagerness to learn and desire to contribute in the industry would help me grasp the standards of this position.

Should I be considered for this job, or any job suitable and needed in your research center, I would like to inform you in advance the difficulty of contacting me through my contact number since I reside in a no network coverage area, which is why it would be most appreciated if I could be contacted via email prior to being contacted through the given contact number. I look forward to hearing from you soon. Thank you very much.

Respectfully yours,

KRYSTEL DENICE L. LABRADOR
