Magdalene C. Unajan
Department Head
Department of Computer Science and Technology
Visayas State University
ViSCA, Baybay, Leyte

Dear Ms. Unajan:

I am interested in the faculty position posted on the VSU Jobs website. The minimum qualifications requires the applicant to be a MSCS/MCS/MSIT/MIT graduate, or with MS units, currently I only hold a BSIT degree, but I offer my working experience and knowledge from a relevant field to contribute to the roadmap of the department and to complete the tasks that will be assigned to me.

Previously, I worked in a research and development company that provides imaging products and solutions to mid-size and large organizations and now to small business owners. I was able to understand the weight and effects of business needs and the global market to the product planning, specification, development, certification, and marketing.

As an embedded test engineer, I contributed to the successive delivery of new firmware and products. I researched on current technologies to propose, prototype, and develop automation applications to improve efficiency in our quality assurance deliverables while also presented the tools to different departments. Through this, I was able to understand the best outlook of an aspiring programmer, developer, or engineer must have aside from being able to write clean and maintainable code lines.

In relation to the job posting, I have been intending to work in academe so I can be able to share my knowledge, skills, and expertise to prepare the students and to help them earn the right skillset and attitude before graduating. Please email or call me to set up an interview. I look forward to hearing from you.

Sincerely,

Rodney M. Maniego Jr.
