MELVIN TAN PACAMPARA

APPLICANT

PROFILE

A detail-oriented and innovative Computer Engineer with a solid foundation in hardware and software integration, system architecture, and embedded systems. Proficient in designing, developing, and optimizing complex computing systems with a good grasp of programming languages such as C/C++, C#, Python and Java. Experienced in circuit design, microcontrollers, and networking fundamentals. Adept at problem-solving, collaborating in cross-functional teams, and delivering robust technical solutions to IT problems. Passionate about staying current with emerging technologies and contributing to impactful projects.

WORK EXPERIENCE

STI Calbayog

AUGUST 2024 - JUNE 2025

Part Time Faculty Member

- A dedicated and knowledgeable IT professional serving as a part-time faculty member, responsible for delivering high-quality instruction in information technology courses.
- Skilled in designing and facilitating engaging lessons on programming, software development, database systems, and emerging tech trends.
- Committed to fostering a practical and supportive learning environment that bridges theoretical knowledge with real-world application, while continuously mentoring students in both academic and career growth.

PADES Printing

JANUARY 2022 - JUNE 2022

Digital Artist

- Created high-quality digital artwork and layouts for various print materials, including brochures, banners, business cards, packaging, and promotional items.
- Collaborated with clients and the print production team to ensure design accuracy, brand consistency, and print specifications were met.

TÜV Rheinland

MAY 2020 - JULY 2020

I.T. Support Intern

- Assisted in troubleshooting hardware and software issues for end-users, including desktops, laptops, printers, and mobile devices.
- Provided first-level technical support via phone, email, and in-person, ensuring prompt resolution of user concerns.
- Ensured all of the electronic equipment in the Facility are properly working.
