

DR. ROBELYN T. PIAMONTE

*Head, Department of Pest Management
OIC, Plant Disease Diagnostic Laboratory
Visayas State University
Visca, Baybay City, Leyte, Philippines*

January 16, 2024

Dear Madame:

Good day!

The recent advert for a part-time instructor position in your humble department has caught my attention and appeared to be a perfect match for my skills, interest, credibility and future potential.

As a product of our globally competitive Visayas State University and was then a DOST Scholar too, I have always been an enthusiast in learning, in research and in sciences which also made me grew fond of imparting knowledge to my colleagues, classmates and juniors. It is my belief that I could be an asset in displaying the core competencies specially in instruction.

With a bachelor's degree in Agriculture, Major in Plant Protection and specialization in Plant Pathology, I graduated with Latin distinctions. The recent National Licensure Examination for Agriculturists administered by the Professional Regulation Commission also earned me the 7th top spot among all takers. It would be an honour if I were to serve my first professional juncture in your institution and with high hopes for a working environment conducive to career and personal growth and development.

Greater details of my scholarly journey, experience and achievements can be found in the resume that came attached with this letter.

If you feel I have the potential you are looking for the said position, please do not hesitate to contact me should an interview is to be arranged.

Thank you so much for taking the time to review my application.

Yours sincerely,

MARK ANTHONY E. MATA
