**DR. EDGARDO E. TULIN**

President

Visayas State University

Thru: **DR. JANNET C. BENCURE**

Head, Department of Geodetic Engineering

Dean, College of Engineering & Technology

Dear Sir:

Greetings to your kind office!

I am reaching out to you regarding the availability of a part-time instruction position in the Department of Geodetic Engineering. I have a great interest in working part-time with DGE and sharing my knowledge and experience in the industry.

I am a licensed geodetic engineer, currently working as a private practitioner. As the head Geodetic Engineer/ owner of my own surveying firm, I have experience delivering different types of surveys, which are mostly isolated surveys. Here, I was able to enrich my knowledge of the geodetic engineering profession through fieldwork and flourish as an effective communicator to ensure that all stakeholders' needs were both effectively communicated to the team and met to the clients' highest level of satisfaction. Prior to being a private practitioner, I worked as an instructor in the same department (DGE), teaching geodetic engineering subjects. I also handled research and extension (community involvement) projects during my tenure at the university. I learned to work in interdisciplinary teams that included both technical and non-technical disciplines, which honed my interpersonal abilities. These experiences have helped me become adept at delivering quality services and results. I am confident that my educational background and experiences make me the ideal candidate for the position.

The attached documents provide further detail about how my qualifications and background are a match for the position.

I appreciate your taking the time to review my credentials and experience.

Sincerely

Diana Christa G. Milloza
