Dear Mr. Lina,

As a graduate in secondary education major in mathematics at Franciscan College of the Immaculate Conception, I have a strong interest in pursuing a teaching career. With experience working at FCIC in the elementary, secondary and tertiary level, as well as activities outside the classroom, I have a simple background but with much to offer.

My first classroom teaching experience was during high school when I served as a volunteer catechism religion teacher at a public elementary school for 1 ½ years. It was rather a nervous experience but rather an exciting and challenging part for me as a high school student.

I had my student intern teaching experience at 7<sup>th</sup>, 9<sup>th</sup> and 10<sup>th</sup> grade levels both in private and public schools. During these pre service experiences, It was rather enjoyable to see what you taught the students be applied to them not only the knowledge based learning but also the other aspects that help the learner grow. My simple preparations of various lessons have allowed me to break down the difficult topics into more easy lessons so that the learners could grasp easily.

For the last two years, while studying for my post grad degree, I taught mathematics to tertiary level students. Managing and Teaching students any topic and concepts of math during the height of the pandemic was rather a difficult hurdle I had to face. But despite that, education and learning never stops. I had to think of different activities that would still give the students' the quality education that they deserve despite being at home.

My resume is enclosed; Feel free to contact me at 0936694861 or 09387420667 or at my email [galeos.marckandrew@gmail.com](mailto:galeos.marckandrew@gmail.com). I look forward to speaking from you.

Thank you for your consideration.

Respectfully Yours,

Marck Andrew Galeos
