**EUSEBIO R. LINA JR.**

Head, Department of Mathematics and Physics

Visayas State University

Visca, Baybay City, Leyte

Dear Sir,

Greetings!

I was so pleased and excited when I saw an online post about the hiring in your Department. Thus, I would like to show my sincere interest to apply as a part time instructor.

I am a certified licensed Agricultural and Biosystems Engineer by the sovereign grace and will of God. And I am currently working as a service contracted Science Research Analyst in the Philippine Center for Postharvest Development and Mechanization (PHilMech) earning 1 and half a year of experience. I am currently designated as the Provincial Focal of Leyte in Region 8 of the Visayas Cluster under the RCEF Mechanization Component Program. My fieldwork focuses on the validation and evaluation of farmer's association and/or cooperatives (FCA) in every municipalities as potential recipients of the RCEF program and facilitating the deliveries and monitoring of rice machineries in the whole province of Leyte. I also experienced conducting training courses in which the participants are the farmers itself and in conducting and organizing turn-over ceremonies of rice machineries in different areas of region 8.

I am confident that the knowledge, techniques, and the interpersonal skills I acquired and developed will be of great tool as a guide for me to become a competent and effective instructor to our dear students in our Department. I am truly passionate in imparting my knowledge to whoever are my audience and it is always my goal that they will acquire new knowledge and ignite inspiration from my discussions.

I had lots of roller-coaster ride experience during my fieldwork and training activities that would truly fascinate and inspire you and I would be more than happy to share it with you through an interview, also to demonstrate to you my passion in teaching. You can contact me at any time of your convenience. I also attached herewith my documentary requirements for your reference.

More power and God bless!

Sincerely yours,

**ENGR. GELIANE L. PROMENTERA**
