**Marlon M. Tambis**

Director, Philippine Root Crops Research and Training Center

Visayas State University

Baybay City, Eastern Visayas, Philippines

Dear Mr. Tambis,

I am writing to express my keen interest in applying for the **Science Research Aide** position at the Philippine Root Crops Research and Training Center. As a graduate of Visayas State University with a Bachelor of Science in Animal Science and with extensive experience in agricultural research, I am confident that my background and skills align well with the requirements of this role.

I worked as a Science Research Aide at the Advanced Research and Innovation Centre, where I was actively involved in the project "Bioactivity and Molecular Characterisation of Lead Compounds from Candidate Antidiabetic Indigenous Plants." My duties included helping with procurement, carrying out experiments, assisting students with experimental design, and making sure that research tasks were completed on time. At the Philippine Root Crops Research and Training Centre, I also worked as a Science Research Aide before this, helping with field assessments, data collection, report writing, and organising research activities with regional stakeholders.

Among my technical abilities are data collection, fieldwork, bacterial culture testing, and mammalian cell culture. I am also skilled in using Microsoft Office programs and productivity tools, which make data analysis and report production more productive.

With my practical expertise in agricultural research, my ability to work well with researchers and stakeholders, and my excellent technical and analytical abilities, I believe that I can contribute significantly to your team. I'm eager to use my knowledge of laboratory analysis and field research to help the center's current and upcoming research projects.

I would appreciate the chance to talk about how my qualifications and experiences meet your demands. Kindly evaluate my resume, which is attached. I appreciate your thought and time. I'm excited about the prospect of helping your research initiatives succeed.

Respectfully yours,

Christian Art L. Chua
