September 11, 2022

ELIZABETH S. QUEVEDO, PhD, RCh

Associate Professor
Department Head, Department of Pure and Applied Chemistry
College of Arts and Sciences
Visayas State University
Baybay City, Leyte 6521-A

Dear Dr. Quevedo,

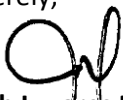

It is with pleasure writing to your good office with regards to your recent hiring of chemistry part-time instructors. I graduated Bachelor of Science in Chemistry from the Visayas State University – Baybay this year. My interests revolve around chemistry laboratory work, data presentation, and data interpretation all of which I am sufficiently adept and experienced. I was informed of the department's job vacancies, and fortunately one of the positions that I can qualify for.

In my high school and undergraduate years, I had constant involvement in scholarly and extra-curricular activities including research congresses and leadership training. I have worked before as a part-time assistant secretary of the barangay hall of our locality and was assigned to encoding, printing, and communication of official documents of the said office. I have also dealt with locals which included students, parents, and the like on a daily basis during the mentioned work.

Visayas State University is one of the prominent universities for chemistry studies. It is envisioned as being globally recognized in academic excellence with a high level of competence and integrity anchored on service and research. To be able to work in this kind of institution would absolutely allow me to grow as a researcher and a future educator.

With all that said I am very much looking forward to being interviewed for the position. My contact information can be found below and thank you for making it this far in this letter's length.

Sincerely,

Judah Luzares Pobadora
