Experience

2022-2023

MFRDC-NFRDI I Guiuan, Eastern Samar

On the Job Trainee

As an intern, we are in charge to manage various hatcheries. I am assigned to Abalone hatchery where I learned the biology of Abalone. Here, regulating and monitoring the organism habitat is very crucial, specifically the water quality where its salinity, pH level, and temperature is monitored every morning and afternoon with exact time schedule. NFRDI employees in collaboration with the BFAR employees and with the intern, collect seaweeds, which is fed to adult Abalone. Diatoms specifically Navicula and Amphora are fed to juvenile abalone; it is reproduce in the Phycology laboratory. We conducted a case study which is presented to the head of the Regional office of NFRDI together with the other staffs.

2021-2022

University of Eastern Philippines I University Town,

Catarman Northern Samar

Student Council Vice President

Collaborate with the Student Council President to plan and execute events, meetings, and activities. Assist in budget management and financial planning. Represent the student body in school-wide decisions and initiatives. Developed strong relationships with faculty and staff members.
