Thru;

ROBELYN T. PIAMONTE, Ph.D.

Head, Plant Disease Diagnostic Laboratory
Visayas State University
Visca, Baybay City, Leyte

Dear **Maam Yepes**,

Greetings!

I would like to express my sincerest interest to apply as **Science Research Specialist 1** to be assigned at the Plant Disease Diagnostic Laboratory. The opportunity presented based on your posting is very appealing and the information I had read suits my ability and career aspirations, with that I would be delighted to be considered for the role.

I graduated from Visayas State University with a Bachelor's Degree in Agriculture, with a Plant Protection major specializing in Plant Pathology. I graduated Cum Laude last 2019. This year, I also finished my Master's degree in Plant Pathology minor in Plant Protection at the same university. Last year, I worked as a part-time instructor at the institution's Department of Pest Management handling crop protection laboratory courses. Currently, I am the Science Research Assistant of the Plant Disease Diagnostic Laboratory, a service laboratory under the Office of the Vice President for Research, Extension, and Innovation of Visayas State University.

I believe that my qualifications and acquired skills during my educational process and work experience would fit for the position that is available. I would love to welcome the opportunity to put on my knowledge and skills at the service offered and contribute to its growth.

This letter can't explain my potential in depth. Thus, I am very much interested in an interview and other screening procedures which might be necessary for this matter.

Thank you for your attention and time. I certainly look forward to hearing from you soon about this employment opportunity.

Respectfully yours,

MARIEL BERNABE LIM-LEBIOS
Applicant
