ANATOLIO N. POLINAR, PhD

Department Head
Department of Forest Science
Visayas State University
Visca, Baybay City, Leyte

Sir:

Greetings!

This letter is an expression of my interest in applying for the Associate Professor II position currently open in your Department. I find working in the academe is the perfect avenue to continue my career in Forest Science and the best way to impart my knowledge and experience to the young minds.

I know education is a never-ending process. While I eagerly await to learn from you to the utmost extent, I am also assertive that my experience makes me an excellent candidate for the position that will fill your need. For about four years, I have worked for the executive department of the Philippine government responsible for the country's environment and natural resources. I have assisted the implementation of several government projects related to reforestation, protected area, cave, inland/wetland, and critical habitat management and protection program. I organized meetings, events, and workshops and secured constant communication with the stakeholders (e.g., NGO, local officials, People's Organizations, and Indigenous People) and members of the local community regarding the progress of a certain project. This training ground has given me the best opportunity to be open-minded and extend my technical knowledge to the marginalized and to those who have not received proper education.

Currently, I am in the last stage of my Master studies which I aim to finish by the end of November 2022. Studying in one of the best universities in Germany has profoundly expanded my horizon in terms of science. I also had the privilege of meeting and working with new people from different countries with diverse principles and beliefs, which recalibrated me to be culturally sensitive and improved my communication skills. Eminently, I am delighted to share what I have acquired so far with VSU as my medium, and to contribute to the attainment of its overall goals and objectives as well as that of the Department of Forest Science.

My capabilities and achievements are stated in my CV. But more than the list of my competence is my dedication and commitment to deliver tasks more than what is assigned, whether I do it individually or in a team. Thank you so much for taking the time to read this letter. I look forward to hearing a great news from you soon!

Sincerely,

MA. ANELI A. AUGUIS
