

Daniel C. Lor

Department Head
Department of Meteorology
Visayas State University
ViSCA, Baybay City, Leyte

Dear Sir Lor,

I am writing to apply as Instructor for the Department of Meteorology in the Visayas State University, ViSCA, Baybay City, Leyte. Enclosed with this letter is my Curriculum Vitae for your consideration.

I am currently an MS Meteorology student from the Institute of Environmental Science and Meteorology (IESM), University of the Philippines – Diliman, Quezon City, and currently working as a Junior Research Associate under the IESM, handling the Synoptic Laboratory. I have finished my coursework and currently finishing my thesis. In my experiences, on both graduate studies and as a researcher on various DOST projects, I believe that I am sufficiently equipped with the technical capabilities and knowledge in the field of Meteorology, Oceanography, Agro-meteorology, as well as Remote Sensing and its applications to the said fields. Currently, I am working on the analysis of oceanic and atmospheric parameters aiming to improve and produce a better seasonal rainfall forecast for the Philippines. On my previous work as a research staff we lead the ground work for research on drought in the Philippines aiming to mitigate and provide tools for smart and resilient agriculture. I support the vision of the university and hope to contribute in achieving its goal.

Thank you very much and hoping for your positive response.

Sincerely yours,

Raymond Jess G. Goliat
