Engr. Gladys G. Doydora
OIC Head - Department of Civil Engineering
Visayas State University
Visca, Baybay City, Leyte

Greetings Engr. Doydora:

I would like to apply for the position of being a part-time instructor in the Department of Civil Engineering VSU Main Campus. I learned about this information through Engr. Hanzel Mejia with message that he delivered on the VSU Alumni Group in messenger. I've always wanted to experience teaching ever since I was still studying during my college days in our own department. I will be greatly honored and grateful if you will give me the opportunity to teach the students and impart the knowledge they needed for them to learn more about civil engineering.

I finished my BS in Civil Engineering degree in the Second Semester of School Year 2019 – 2020 at the Visayas State University – Main Campus. I recently passed the November 2021 licensure examination for Civil Engineers but due to the pandemic I choose to stay at home for the mean time since my parents do not allow me to work in far places. But right now I would like to take this opportunity for me to work and gain some experiences that will help me to develop my skills and work ethics. I believe that I possessed the certain qualifications you are looking for a part-time instructor since I came from our own department and all the instructors in our department have always trained us to practice excellence and develop well our values and integrity.

I would be very much like to discuss the opportunities to work as a part-time instructor in the department. Please call me at 09510345021 or send me an email that verifies me to qualify for the interview. You can call me anytime between 7:00 am up until 12 midnight. I will be waiting patiently for your reply.

Thank you for taking the time to review my application maam. I look forward to talking with you.

Sincerely,

FELIPPE NIÑO C. LUSARES
