Engr. Vic Angelo L. Impas
Department of Mechanical Engineering
Visayas State University

Dear Engr. Impas,

I was delighted to discover an opening for Instructor I in the Department of Mechanical Engineering in Visayas State University through the website after scanning multiple universities in Leyte. I wish to be considered as a candidate despite completing only a bachelor's degree in University of the Philippines Diliman.

My teaching experience includes but are not limited to the following: teaching lowerclassmen for an exam as arranged by student organization, sharing solutions to problems among peers taking board exam, compensated private tutoring for an engineering freshman in De La Salle Univesity.

I wanted to be an engineer not to become an operations/maintenance personnel but to continue learning new things through becoming part of the academe or be an engineer of R&D. I wish to keep nurturing my knowledge and to learn is to teach. I'm hoping to effectively share knowledge to others as well for the betterment of the country.

Thank you for your time and I hope to hear from you.

Sincerely,

Maximo A. Laurente III
