Department of Biological Sciences  
Visayas State University  
Visca, Baybay City, Leyte

Dear ma'am/sir,

I am writing to express my interest in the part-time instructor position in the Department of Biological Sciences at Visayas State University. As a graduating student with a Bachelor of Science in Biotechnology, majoring in Plant Biotechnology degree program, I am eager to contribute my knowledge and skills to the academic community. My graduation is scheduled for August 7, 2024.

Throughout my studies, I have developed a comprehensive understanding of biological sciences, particularly in plant biotechnology. My coursework has included subjects such as General Botany, Cell and Molecular Biology, Genetics, Plant Pathology, and Plant Breeding, which have equipped me with a solid foundation in both theoretical and practical aspects of the field. Additionally, my thesis on enhancing drought tolerance in soybeans using mesoporous silica nanoparticles reflects my commitment to advancing research in biotechnology.

I possess hands-on experience in various laboratory techniques, including gel electrophoresis, DNA extraction, and tissue culture, which I believe will be beneficial in a teaching role. My internship at the Center for Tropical Mushroom Research and Development has further honed my skills and provided me with valuable insights into the practical applications of biotechnology. I am also passionate about fostering a deeper understanding of biological sciences among students and committed to creating an engaging and supportive learning environment. I believe that my academic background, combined with my enthusiasm for teaching, aligns well with the goals of the Department of Biological Sciences.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to the educational mission and vision of Visayas State University. My CV is enclosed for your review.

Respectfully,  
Jezza Mae. Enopia
