Dear Ma'am;

Good day!

I am Jerome T. Amarado, 25 years old, single and a resident of Brgy. Tabigue Abuyog, Leyte, currently residing at Brgy. Guadalupe. I graduated with the degree of BSA, major in Agronomy at Visayas State University last June, 2019 and currently finishing my Master of Science-minor in Horticulture. I have exposed to actual works; I was able to undergo 240 hours field practicum (skills development) in the university which gave me the opportunity to apply my knowledge and skills gained in the classroom. I was also exposed to research works when I conducted my undergraduate thesis entitled "Growth and Yield performance of Upland Rice Intercropped with Peanut as Influenced by Different Timing of Planting". I was also hired as an SRA in Department of Agronomy last August, 2019-December 2021, and exposed to manage the project in three barangays (Patag, Pangasugan and Marcos) entitled "Season Long Promotion of VSU Low Cost Rice Production Technology".

I am applying for a position as a Science Research Assistant in your prestigious department. I want to serve at your department because I believe that a person's experience is the most important time of their learning growth and it will enable me to fulfill my professional goal of becoming an agriculturist who serves passionately through research.

My strengths include being able to work well a variety of personalities, to converse well with anyone, and to adapt easily into new environment with creative and resourceful attitudes.

Very truly yours,

Jerome T. Amarado

Applicant
