ROBELYN T. PIAMONTE, PhD
Head, Plant Disease Diagnostic Laboratory
Visayas State University
Visca, Baybay City, Leyte

08 July 2024

Dear Dr. Piamonte,

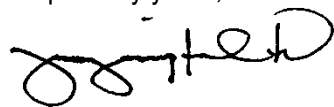

I am reaching out to convey my sincere interest in the **Science Research Specialist I (SRAS1-1-2013)** position recently announced on your job recruitment website. My background includes a diverse set of skills and experiences that closely match the requirements outlined for these positions, such as:

- *Relevant Experience.* My time at the Regional Crop Protection Center of the Department of Agriculture Regional Field Office VIII has equipped me with valuable fieldwork, laboratory work, and administrative tasks. Furthermore, my participation in various training programs during my undergraduate studies in Agriculture, with a major in Plant Protection and specialization in Plant Pathology, has equipped me with practical experience in both field and laboratory settings. I am proficient in handling microbial cultures, preparing media, inoculating cultures, maintaining strict aseptic conditions, and diagnosing plant diseases. Moreover, I am a licensed agriculturist, which adds to my professional competency in the field.
- *Organizational and Research Proficiency.* Serving as a science instructor and research office staff member, I have honed strong organizational skills, effectively balancing academic responsibilities with research endeavors focused on meticulous data collection and analysis. Active participation in research conferences has further sharpened my research and academic writing skills. I possess a solid foundation in report writing, ensuring clarity, conciseness, and logical organization of documents. I am committed to enhancing my skills in academic writing and research, with increasing exposure to quantitative methodologies and an emerging interest in qualitative research approaches.
- *Willingness to learn and initiative.* Pursuing a Master's in Agricultural Development demonstrates my commitment to continuous learning. I approach problem-solving proactively, embracing new challenges as opportunities for growth, and demonstrating initiative in professional development.

I am confident that my blend of skills, experience, and eagerness to learn renders me a well-suited candidate for the Science Research Specialist I position, and I am enthusiastic about the opportunity to discuss this further. Enclosed, please find my Personal Data Sheet and other relevant documents for your perusal.

Thank you for considering my application.

Respectfully yours,

MARY EIMEREN P. TUMULAK
