**DR. LUZ G. ASIO**

Department Head  
Department of Agronomy  
Visayas State University  
Baybay City, Leyte,6521, Philippines

Dear Madam

I am writing to express how passionately interested I am in the academic teaching position (**part-time INSTRUCTOR**) being offered at Visayas State University (VSU), Baybay City, Leyte. I believe I have the skills required to have a positive impact on the academic community at your respected institution as a passionate and committed educator with a strong dedication to encouraging intellectual growth and inspiring a love of learning.

I graduated from Central Philippines State University's Kabankalan Campus with a Bachelor of Science in Agriculture with a specialization in crop science, and I am about to earn a Master's in Agronomy with a minor in Agricultural Extension from Visayas State University in Baybay City, Leyte. I have been a project assistant for the CHED Edutourism Study in the Philippines program and the Department of Science and Technology's Community Empowerment Through Science and Technology Program (DOST-CEST) for six months under the Research, Development, and Extension Center of CPSU. I have one and a half years of experience as a research assistant at the Central Philippines State University-Kabankalan Campus. Also, I have been a faculty member of the Cebu Technological University (CTU) Tuburan Campus for the academic year 2023-2024. Over the course of my work, I have created a community-centric teaching and extension strategy that promotes involvement in technology innovation, intellectual-ethical discourse, and community alleviation.

My field of expertise is agronomy and agricultural extension, and I have effectively used extension work to teach farmers and students about technologies like vermicomposting, hydroponics, and cropping systems. I attended the Southeast Asian University Consortium for Graduate Education in Agriculture and Natural Resources (SEARCA) (UC Summer School 2023) at the Chulalongkornrajavidyalaya University Sakon Nakhon Province Campus and Bangkok Campus of Kasetsart University in Thailand. My research interests include intercropping schemes, upland rice farming, and mushroom production. I presented my findings at an in-house review that focused on sweet potato production techniques. I'm committed to staying current in my profession, and I think that my experience in research will benefit both students and colleagues in their academic endeavors.

In conjunction with my credentials, I actively participate in departmental service and student activities. I have participated in a number of committees, such as the CPSU Chapter of Future Leaders of the Philippines. These opportunities have given me the chance to hone my leadership and teamwork abilities, which I think will be extremely helpful in supporting the university's thriving academic community.

The dedication of VSU to academic quality, cutting-edge creative research and technology, globally competitive human resource development, and student achievement has greatly impressed me. My educational philosophies are exactly in line with your institution's reputation for establishing a welcoming and varied learning environment. I am thrilled to have the chance to join the esteemed faculty of VSU and support the institution's future development and success.

My curriculum vitae, which gives a thorough summary of my educational history and research accomplishments, is enclosed. I would be happy to go into more detail on how my knowledge and enthusiasm might benefit the academic community at Visayas State University.

I appreciate your taking a look at my application. I'm excited about the prospect of joining your university's faculty and earning respect. If you need additional documents or information, please find my contact details below.

Respectfully,

**JOEMEL A. LABRADOR**
