ENGR. GLADYS G. DOYDORA

OIC-Department Head, Department of Civil Engineering
Visayas State University – Main Campus
Visca, Baybay City, Leyte, Philippines

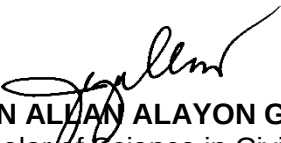

Dear **Engr. Doydora**:

Having learned from the publicity of the official webpage of the Visayas State University the need of a part-time faculty for the Civil Engineering department, I would like to express my sincere interest to reapply as Part-time Faculty of the department.

I am a graduate of Bachelor of Science in Civil Engineering at the Visayas State University, Main Campus last 2020 and rendered my field works as a trainee during internship at the Momentum Construction and Development Corporation, Cebu Branch. A refined construction company that offers a wide range of civil works in the industry. I served as the former VSU Student Regent for year 2017-2019 and was able to experience first-hand the job of being in the public higher education institution. Last school year 2020-2021, I served as a part-time faculty of Southern Leyte State University – Main Campus. I am currently affiliated with Visayas State University, Main Campus handling Engineering Sciences courses.

Aside from my great willingness to be involved in the public service, I also have varied interests that would help promulgate the mandate of the department and school. With the experiences that I acquired as an instructor of a higher education institution, I totally developed myself in handling different people especially the relationship between the students during this time of flexible learning. I also often participate on the reviews and strategic planning to develop the status of departments to at least set it to standards and to let it constantly develop. It is also my passion to be of great help in the institution that I work for because I was taught to be well mannered and professional in my undertakings and services. My relationship between the different sectors of the university had provided me the much-needed experience to grow professionally in the academe. If granted with the privilege, I could commit that I will render my services in full capacity and with willingness to holistically develop under the institution.

I look forward on engaging with you at your earliest convenience. Please free to contact me at your most convenient time thru my email; allan.gulles@vsu.edu.ph or thru my digits; [+63961-240-3739](tel:+63961-240-3739) to discuss future employment opportunities. Thank you and more power.

JOHN ALLAN ALAYON GULLES
Bachelor of Science in Civil Engineering
Visayas State University
