Mrs. Honey Sofia V. Colis
Director, HRMO
VSU, Baybay City, Leyte

Dear Ma'am/Sir,

I am writing to express my strong interest in the Science Research Specialist I position (Job Code: BUFRCW) at the Office of the Vice President for Research, Extension and Innovation (OVPREI), Visayas State University. As a Bachelor of Agriculture graduate specializing in Plant Breeding and a master's degree in Horticulture at VSU, I possess the academic foundation and research expertise that align perfectly with this role.

My research background encompasses significant projects demonstrating my agricultural research and laboratory work capability. My undergraduate thesis focused on "Yield Evaluation of Selected White Corn (*Zea mays* L.) Varieties Suited in Danao City, Cebu Condition," which honed my skills in field experimentation and data analysis. Currently, my master's research on "Development Protocol/Culture Medium for Pollen Germination of Coconut (*Cocos nucifera*) Cultivar Baybay Tall (BAYT)" has further strengthened my expertise in advanced laboratory techniques, particularly in plant tissue culture and embryo culture.

I have developed proficiency in essential research tools and statistical software, including R Studio, Statistical Tool for Agricultural Research (STAR), and Statistical Package for the Social Sciences (SPSS). These technical skills, combined with my substantial background in data collection, analysis, and documentation, enable me to contribute meaningfully to research projects from conception to completion.

Although I am beginning my professional journey, I bring fresh perspectives, solid theoretical knowledge, and an unwavering commitment to scientific excellence. I am a quick learner, detail-oriented, and passionate about contributing to meaningful research. I am confident that my academic background, enthusiasm, and dedication to scientific research make me a promising candidate for this position.

I welcome the opportunity to discuss how my skills and enthusiasm for agricultural research can benefit your team. Thank you for considering my application. I look forward to contributing to VSU's research mission as a Science Research Specialist.

Respectfully yours,
Charette
