Dr. Dennis P. Peque  
Director  
Regional Climate Change Center  
Visayas State University

Dear Dr. Peque,

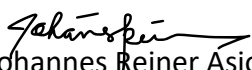

I wish to apply for the **Assistant Professor** position at your prestigious university. I obtained my Master of Science in Environmental Science from the University of the Philippines-Los Baños where I graduated as Class Valedictorian at the School of Environmental Science and Management (SESAM). For my Master's thesis, I developed a novel qualitative approach to reviewing the potential risk of surfactants, an emerging contaminant, to organisms and its impact on various environmental media which was recently published in a high-impact Elsevier journal. I finished my Bachelor of Science in Environmental Management, specializing in soil pollution management (Magna Cum Laude & Class Salutatorian) at Visayas State University, Baybay City in 2017.

At present, I am working as a sustainability analyst of financial and real estate companies. Prior to my MS studies, I also worked for two years as an Instructor at the College of Forestry and Environmental Science at Visayas State University. My experience working as a university faculty and my diverse background on various disciplines, both technical and corporate research, would greatly benefit my teaching, research, and extension functions at the university.

Please find my attached CV for your reference.

Thank you very much and I hope you consider my application.

Respectfully yours,

  
Johannes Reiner Asio  
Applicant
